Approved For Release 2003/12/02: CIA-RDP58-00597A000100070153-7

SEGRET

22 June 1951

EDMORANDOM POR THE RECORD

SUBJECT: Proposed New Lodge Hill Authorizing the Retablishment of a "Freedom Corps"

- 1. Colonel King and I learned today that the Joint Chiefs had replied to the request of the Secretary of Defence for comments upon the draft will prepared by General Reber (the draft discussed in my memorandum of 1 June 1951) by submitting a new draft which removes all of the limitations and restrictions in the Reber draft and which simply authorises the Secretary of the Army to emlist aliens as though they were US citizens. Apparently, the language repeals all statutory provisions which prohibit the emlistment of aliens. It was our universtanding that the study which accompanied this draft expressed the Joint Chiefs' view that the problem is a "manpower problem" and should be treated accordingly, and that alien emlistees should not be kept segregated in separate units but should be integrated fully into US forces.
- 2. Although the removal of the restrictions which were in the Reber draft would be helpful, it would, of course, be most desirable from CIA's point of view that the enlisters be kept separate. However, there is nothing in the draft on this point and presumently it could be taken core of through the administrative regulations which the Secretary of the Army would issue if the bill were submitted and passed.
- 3. The Joint Chiefe' comments are now in the Office of the Secretary of Defense where I preside they will be handled for General Marshall by Mr. Goodrich and Mrs. Resemberg. General Magnuder is more of the problem and we intend to keep in touch with his regarding future developments.
